 inclusive,

Defendants.

Case No. CV 15-4878 DMG (AGRx)

Assigned to the Hon. Dolly M. Gee

**SEVENTH FURTHER JOINT
 QUARTERLY STATUS REPORT
 AS ORDERED BY THE COURT**

Action filed: June 26, 2015
 Discovery: Stayed
 Trial date: None set

1 The parties jointly submit this Seventh Further Joint Status Report.

2 The six prior joint reports were filed on:

- 3 1. January 19, 2018 (Dkt. 91);
- 4 2. October 19, 2018 [Dkt. 96];
- 5 3. November 14, 2018 [Dkt. 98];
- 6 4. February 7, 2019 [Dkt. 100];
- 7 5. February 28, 2019 [Dkt. 103]; and
- 8 6. May 14, 2019 [Dkt. 117].

9 This Seventh Further Joint Quarterly Status Report addresses the status of the
10 site investigation of the environmental contamination in question and returning to
11 mediation to conduct a second session. [Dkt. 116]

12 1. Site Investigation

13 Pacifica is in the field implementing an enhanced reductive dichlorination
14 (“ERD”) Pilot Test. The purpose of the ERD Pilot Test is to obtain information that
15 will assist in an appropriate full-scale groundwater remediation design, including
16 evaluation of the effectiveness of ERD, which is to include bioaugmentation. From
17 July 8 to 26, 2019 and from August 12 to 23, 2019, Pacifica Chemical’s
18 environmental contractor (“Murex”) has performed/is performing pilot study
19 injections, and reports to DTSC that it will conduct weekly monitoring of select
20 wells for the first four weeks following the injections, and then monthly monitoring
21 for the next four months.

22 In addition, Murex conducted second-quarter monitoring well sampling on
23 June 7, 2019 and submitted a report to DTSC on August 9, 2019 reporting on the
24 results from the first and second quarter sampling events at the Site.

25 2. Mediation

26 The parties continue to anticipate returning to mediation with Mr. Gallagher
27 after some ERD Pilot Test results are available, which could be as soon as
28 November 2019. The final pilot study, however, will not be submitted to DTSC until

1 around April 2020. Nonetheless, the parties continue to believe significant strides
 2 were achieved with Mr. Gallagher's assistance on February 22, 2019, and further
 3 believe that a complete resolution can be achieved at the second session once more
 4 is known about the extent of contamination and remedial options available to
 5 address it.
